Kigali/Rwanda

Software engineer enthusiast equipped with back and front-end software development skills to solve business problems. Throughout my career as a developer, I have had several working and professional training experiences in full-stack application development using Django, Fast-API, and the Spring-Boot framework. I am a self-starter, always eager to learn and willing to take up new challenges. I have a strong educational background and professional experience that I believe can assist me in accomplishing my task. I'm actively looking for a career opportunity to put my skills to use while also gaining new experience.
